# Periodontitis

PERIO - AROUND  
DONT - TOOTH  
ITIS - INFLAMMATION

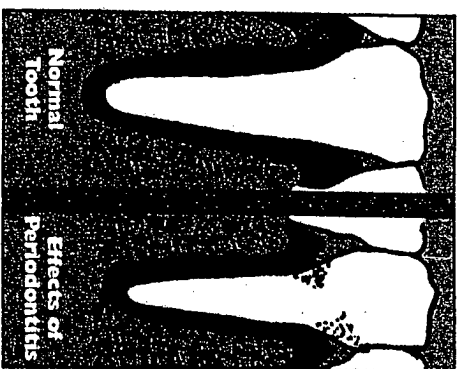

Periodontitis is caused by active bacteria (plaque) accumulated in hard deposits (tartar) not cleaned out of the gum line crevices around the teeth. The accumulation on the tooth's root contributes to bone loss and ultimately, tooth loss. Your susceptibility to this infection is also affected by stress, poor nutrition, medications and immune deficiencies.

Periodontitis rarely hurts. Most of the time, you cannot see it. Seven out of ten adults have it; it is the major cause of tooth loss after age 35.

*Periodontitis is not curable, but is is treatable and manageable.*

*GumAerobics™ is a program that will help you achieve and maintain a healthier mouth as simply, painlessly, inexpensively and efficiently as possible.*

In partnership with your periodontal therapist, you will have the tools and the knowledge to keep your teeth for a lifetime!

## Your GumAerobics™

### Schedul :

- Review of appropriate maintenance interval and other conservative therapies for control of disease

As a courtesy to our patients, we are happy to complete all insurance claim forms.

You should be aware that all insurance companies are not the same and coverages do vary. Most major insurance companies pay 50-80% for periodontal therapy, subject to any policy deductibles or limitations.

Our financial coordinator will take the utmost care to properly submit your claim to your insurance carrier and maximize any reimbursement available to you. A copy of this submission will be given to you for your records.

Please note; although we can estimate insurance coverage for your bill, we cannot guarantee what the exact portion of your payment will be. Therefore, all changes incurred for your therapy are your responsibility.

Rest assured we will do all we can to help you receive the best insurance coverage. If you have any questions concerning your bill, please feel free to call and speak with our financial coordinator.
